SUMMARY

Full-stack engineer with Backend & Cloud focus and 5+ years designing event-driven, serverless systems on AWS for B2B SaaS environments. Background spans distributed systems architecture, production ML integration, and infrastructure-as-code across cloud-native engineering teams.

CORE SKILLS

Languages: Python, TypeScript, JavaScript, SQL, C++, Bash

Backend: FastAPI, Node.js, REST APIs, Nest.js, Microservices, Event-Driven, OpenAPI, GraphQL, asyncio

Cloud: AWS (Lambda, EventBridge, API Gateway, S3, DynamoDB, CloudWatch, Cognito, IAM), AWS CDK

Databases: PostgreSQL, DynamoDB, MongoDB, MySQL, SQLAlchemy, DuckDB

Infrastructure: Terraform, CloudFormation, Docker, Kubernetes, CI/CD, Infrastructure as Code, Sentry

Frontend: React, Vite, MUI

Data / AI: Pandas, NumPy, Plotly, Datashader, Vector Search, LLM Integration

Testing: Playwright, Pytest, Jest, Cypress

CERTIFICATIONS

AWS Solutions Architect Associate (SAA-C03), 2026

HashiCorp Terraform Associate 004 — *in progress*

EXPERIENCE

Full-Stack Engineer, Backend & Cloud — Brother ISM GmbH | Germany (remote) Jul 2023 – Oct 2025

- Developed core backend services for Myze, a commercial B2B SaaS platform for industrial print-on-demand operations (DTG, DTF, embroidery), serving ~30 client companies across Europe.
- Architected cross-company order routing system enabling cross-organizational fulfillment of orders.
- Built event-driven serverless infrastructure (Lambda, EventBridge, API Gateway, DynamoDB) supporting ~100–200 orders/day across order ingestion, production routing, and fulfillment workflows.
- Implemented time-limited demo accounts via EventBridge: automated product provisioning on signup with automatic tier downgrade after trial expiry.
- Integrated ShipStation and SendCloud for international shipping, including customs documentation.
- Integrated Shopify GraphQL API to sync e-commerce orders into production workflows.
- Designed multi-tenant REST APIs (OpenAPI) with JWT/OAuth2 and Cognito-based authentication; defined IAM roles and least-privilege policies for Lambda execution and cross-service access.

Software Engineer — DataZoo GmbH | Germany (remote) Jun 2021 – Jun 2023

- Productionized ML forecasting models via SageMaker-backed APIs, bridging data science output and production systems for industrial time-series applications.
- Built backend services handling large-scale industrial time-series datasets, working with DuckDB and Datashader to support efficient processing and visualization of high-density data.
- Developed JupyterLab components for iterative visual exploration of time-series data using Plotly.

Earlier (2005–2021): Mechanical Engineer • University Professor & Editor • Relocated to Germany; career transition to software engineering

TECHNICAL PROJECTS

- Japas Audio (VST Plugins). Commercially released audio plugin. C++, JUCE, DSP
- AI Document Q&A. AI-powered document processing backend API. FastAPI, LLMs, Vector Search
- Cryptools. Web3-enabled analytics and tooling platform. Python, TypeScript, React, AWS
- Algo Trading. Algorithmic trading system (Hackshow winner, 2021). Python, NumPy, Plotly

EDUCATION

Data Analytics (Ironhack) | **M.A. Musical Arts** (UNA) | **Mathematics** (UBA) | **Electronics Tech.** (ITSB)
