

# Nicolas Japas

Senior Software Engineer · Full-Stack (Backend & Cloud focus)

German & Argentinian Citizen • no Visa required

nicolasjapas@gmail.com • linkedin.com/in/nicolas-japas • github.com/nicojapas

## SUMMARY

Full-stack engineer with a backend & cloud focus, and 5+ years building production systems for B2B SaaS, specializing in event-driven, serverless architecture on AWS. Background spans distributed systems design, production ML integration, and infrastructure-as-code. AWS Certified Solutions Architect Associate.

## CORE SKILLS

**Languages:** Python, TypeScript, JavaScript, SQL, C++, Bash

**Backend:** FastAPI, Node.js, REST APIs, Nest.js, Event-Driven, OpenAPI, GraphQL, asyncio, Pytest, Sentry

**Cloud:** AWS (Lambda, EventBridge, API Gateway, S3, DynamoDB, CloudWatch, Cognito, IAM), AWS CDK

**Databases:** PostgreSQL, DynamoDB, MongoDB, MySQL, SQLAlchemy, DuckDB

**Infrastructure:** Terraform, CloudFormation, Docker, Kubernetes, Microservices, GitHub Actions, CI/CD, IaC

**Frontend:** React, Vite, MUI, Playwright, Jest, Cypress

**Data / AI:** Pandas, NumPy, Plotly, Datashader, Vector Search, LLM Integration

## CERTIFICATIONS

**AWS Solutions Architect Associate (SAA-C03)**, 2026 | **HashiCorp Terraform Associate 004**, 2026

## EXPERIENCE

**Software Engineer - Independent** | Remote Nov 2025 - Present

- Built a self-hosted LLM inference stack on serverless GPU infrastructure (Modal, vLLM, Qwen3) with an OpenAI-compatible API endpoint, enabling provider-agnostic LLM integration across backend services.
- Founder of **Japas Audio**; built **Digital Decay**, a commercial VST plugin (C++, JUCE, DSP), available at [japasaudio.com](https://japasaudio.com) ↗. Owned the full signal chain from DSP design through 3D UI and commercial delivery.

**Full-Stack Engineer, Backend & Cloud — Brother ISM GmbH** | Germany (remote) Jul 2023 – Oct 2025

- Developed core backend services for Myze, a B2B SaaS platform for industrial print-on-demand (DTG, DTF, embroidery) serving ~30 client companies across Europe, including a cross-company order routing system.
- Built event-driven serverless infrastructure (Lambda, EventBridge, API Gateway, DynamoDB) for multi-step order workflows across order ingestion, production routing, and cross-company fulfillment.
- Implemented time-limited demo accounts via EventBridge: automated product provisioning on signup with automatic tier downgrade after trial expiry.
- Integrated ShipStation, SendCloud (international shipping, customs documentation), and Shopify GraphQL API into production workflows.
- Designed multi-tenant REST APIs (OpenAPI) with JWT/OAuth2 and Cognito-based authentication; defined IAM roles and least-privilege policies for Lambda execution and cross-service access.
- Owned full-stack delivery on customer-facing features, from API design through React and TypeScript UI, across a codebase with no hard frontend/backend split.
- Wrote and maintained unit and end-to-end test coverage (Pytest, Jest, Cypress, Playwright), including migrating and stabilizing suites across the codebase.

**Software Engineer — DataZoo GmbH** | Germany (remote) Jun 2021 – Jun 2023

- Productionized ML forecasting models via SageMaker-backed APIs, bridging data science output and production systems for industrial time-series applications.
- Built backend services handling large-scale industrial time-series datasets, working with DuckDB and Datashader to support efficient processing and visualization of high-density data.
- Developed JupyterLab components for iterative visual exploration of time-series data using Plotly.

**Earlier (2005–2021):** Mechanical Engineer (automated production machinery, XPAK USA & TECNA) and University Professor (National University of Arts, Argentina), often in parallel. Relocated from Argentina to Germany in 2018 and transitioned into software engineering through freelance work and formal training prior to joining DataZoo.

## TECHNICAL PROJECTS

**AI Document Q&A** - RAG API [FastAPI, LangChain, FAISS, MongoDB, Gemini, DeepSeek, Pydantic] ↗

**EduBridge LTI** - LTI 1.3 provider with auto-grading & grade passback [FastAPI, PostgreSQL, OAuth 2.0, JWT, Docker] ↗

**Cryptools** - Crypto markets, token analysis & trading tools [Python, AWS CDK, Lambda, TypeScript, React, Web3.js] ↗

**Interview Trainer** - SWE prep platform, 500+ questions & AI explanations [React, Cloudflare Pages, D1, JWT, Gemini] ↗

## EDUCATION

**Data Analytics** (Ironhack) | **M.A. Musical Arts** (UNA) | **Mathematics** (UBA) | **Electronics Tech.** (ITSB)

## HONORS

**Ironhack Berlin Hackshow Winner** (2021), first across all cohorts • **Argentine Mathematical Olympiad**, National Finalist & International Qualifier

## LANGUAGES

**Spanish:** Native | **English:** C2 | **German:** B2 (TELC Certificate) | **Portuguese:** A2
